

Level 4 Aesthetic Therapy

Your career starts here.

9 months full time
3 days in college
2 days online learning

There has never been a more exciting time to enter the world of aesthetic beauty. If aesthetic beauty is missing something, it is missing a career pathway, but now that has changed. Prospective therapists can progress their career from Level 4 to Level 7, through the combined use of Ofqual regulated qualifications and internationally recognised standards.

Our level 4 qualification in Aesthetic Therapy provides a solid foundation to enter the rapidly growing industry. Once completed you are ready to practice with sought-after Level 4 qualifications including chemical skin peels, micro-needling, IPL for skin rejuvenation, laser for hair removal, radio frequency RF for skin tightening and contouring. Advanced facial electrics, facial therapy, electrolysis, and LED therapy. A robust understanding of topical skin therapy including advanced facials. Dermal science is central to this qualification instilling a sophisticated knowledge of physiology, anatomy, biology and pathology.

The level 4 qualification is designed for people without existing experience, as such core skills of client care, professionalism, ethics, psychology for aesthetic practice and clinical governance are all covered. You will gain the needed skills to holistically treat the bodies largest organ while understanding how diet and environmental factors influence skin health. We move far beyond brand training to equip you with the understanding of the science behind cosmeceutical products and the knowledge of evidence-based practice to make informed decisions for complex treatment protocols. We think you would have to agree; there has never been a more exciting time to enter the world of aesthetic beauty.
