Initiative

Micro-credentials are a new and exciting academic offering from Trinity College. They are short, accredited learning experiences that facilitate flexible and innovative professional development and lifelong learning.

Is it for me?

This micro-credential will be relevant to any multi-professional staff working in healthcare design and delivery across all grades and all services. This cohort includes nurses, midwives, paramedics and other allied healthcare professionals.

What does it cover?

This micro-credential allows healthcare professionals to understand the application of digital health technology. One example is the adoption of the electronic patient records. The content is varied; therefore you will learn to develop a critical understanding of digital health will allow to prepare and apply the knowledge to a real-world problem.

How is it delivered?

This micro-credential will be delivered in a blended format. Learners will take part in in-person tutorials and attend online classes. Two in-person days will be expected during the 12 weeks. Online resources will be available to students.

Key Dates

Course starts: **September**

Applications close date: **August**

How much does it cost? €1200

Credit Value

The credit value of this micro-credential is 10 ECTS. The European Credit Transfer System is a commonly used credit system, recognised by Trinity and by awarding bodies across the EU and in some other countries.

Learning Outcomes

- Have a systematic understanding of relevant national and international policies connected to digital health.
- Be able to critically discuss the data lifecycle and application to real-world examples, such as electronic patient records (EPR).
- Analyse and critically appraise the application of digital health to person-centred, safe and connected care.
- Demonstrate the appropriate application of digital health for a health workplace.

Assessment

Your assessment in this micro-credential will be comprised of a presentation and a digital health proposal.
